

# ELKHORN RIDGE WIND ENERGY PROJECT

Bloomfield, Nebraska

## Project Quick Facts:

- **Location:** Bloomfield, Nebraska (Knox County)
- **Size:** 81 Megawatts (enough electricity to serve approx. 25,000 homes)
- **Turbines:** 27 (Vestas / V-90 / 3.0 MW / 410 feet from base to blade tip)
- **Developer:** Midwest Wind
- **Owner:** Edison Mission Group (Santa Ana, CA), Tenaska (33%)
- **Power Purchaser:** Nebraska Public Power District (NPPD)

## EDISON MISSION GROUP

Through its subsidiaries, Edison Mission Group (EMG) is one of the nation's leading owners and operators of competitive electric power generation. EMG owns and operates 46 power generating facilities in 13 states that sell more than 10,000 megawatts of electricity into competitive, wholesale markets and to utilities.

Active in developing wind energy for over 10 years, EMG currently has 29 wind projects totaling more than 1,800 megawatts of capacity in operation or under construction and an additional wind development pipeline of approximately 3,600 megawatts. The company's portfolio includes the 81 megawatt Laredo Ridge wind energy project, located approximately 70 miles southwest of the Elkhorn Ridge project in Petersburg, NE.
